BANGALORE,
Dated the 11th June 1929.

R. ANANTHASUBRAMANYAM,
For *Director of Industries and Commerce in Mysore.*

OFFICE OF THE SANITARY COMMISSIONER IN MYSORE, BANGALORE.

NOTE ON THE STATE OF PUBLIC HEALTH IN MYSORE, FOR THE WEEK ENDING SATURDAY THE 8TH JUNE 1929.

A total of 19 attacks with 14 deaths from plague was returned for the week against 36 attacks with 25 deaths in the previous week, the Districts affected being Bangalore, Kolar, Mysore and Hassan. The City of Bangalore returned one attack witn one death while the City of Mysore and the Kolar Gold Field area continued to remain free from the disease.

2. Comparative figures for the corresponding week were nil attack and nil death in 1927 and nil attack and nil death in 1928.

3. A total of 17 attacks with 13 deaths from small-pox was returned for three villages in Malur Taluk, one village in Kumsi Sub-Taluk, Malur and Arkalgud towns, the City of Bangalore and the Kolar Gold Field area.

4. Thirteen attacks with 7 death from Cholera were returned for one village in Mudigere Taluk.

5. The State remained free from other Epidemics, *i.e.*, cholera, and relapsing fever.

6. The total mortality for the Bangalore City amounted to 57, representing a calculated annual ratio of 25·00 per mille of population, against the average ratio of 27·06 for 1927. Classified according to causes, the deaths numbered 1 under plague, 1 under small-pox, 1 under malaria, 11 under pneumonia, 2 under other fevers, 6 under phthisis, 5 under dysentery and diarrhœa, and 30 under all other causes.

7. As compared with the Bangalore City the Civil and Military Station returned 55 deaths for the week ending 2nd June 1929, representing a calculated annual ratio of 22·81 per mille of population, against 31·15 in the previous week. The causes of deaths were small-pox 3, other fevers 1, phthisis 6, pneumonia 11, dysentery and diarrhoea 4 and all other causes. 30.

8. The total mortality for the Mysore City was 46, representing a calculated annual ratio of 28·49 per mille of population against the average ratio of 32·82 for 1927. The causes of deaths were malaria 2, typhoid 1, pneumonia 3, phthisis 1, dysentery and diarrhœa 11, and all other causes 28.

9. There were 35 deaths from all causes reported from the Kolar Gold Field area, equivalent to a calculated annual ratio of 20·29 per mille of population against the average ratio of 38·28 for 1927. The causes deaths were phthisis 1, dysentery and diarrhœa 6, and "all other causes" 28

H. NANJUNDIAH,
For *Sanitary Commissioner.*
absent from station.
